Should NOT be on early access yet, Only thing you can do is Bowling, The only person that would like this game in the state it's in is Roman Bellic!

Edit:

Tried to replay it a year and a half later First off the tutorial... why is it needed you just walk around and show off ALSO Where the **** are the graphics settings?!

Secondly verifying email is so annoying it doesn't send the email half the time and even after all that I can't even chnge my in game name?!

As a transgender that's needed badly I have my old ugly name f**k off if you think i want to see that all the time In conclusion this game is♥♥♥♥♥still even a year later.. I nothing about motocross but i can say that the game is fun and challengeing. The physics feel very wiered when start so it takes a bit to get used to. The only think i don't really like about the game is that when your doing a scrub or your trying to whip the bike it feels like your just playing some set animation over and over and you don't have much control over how you whip or scrub. But other than that i love the game.. This game's really good! There are some 50ish or so levels, and practically every one introduces some new mechanic. Likewise, each boss has a trick to beating it, so the game stays fresh all the way to the end. Difficulty wise, most platformers these days are absurdly easy or ridiculously hard, but MagiCat hits a nice balance. Plus, you get to play as a cat wizard. Don't need much more than that.. Even at six dollars I feel ripped off. I did not find my only play fun at all. The gameplay, within minutes, reveals itself to be extremely repetitive, without even decent combat to fill the gaps between, pick this point, wait, pick this option, wait. Sometimes all there is on the screen is a timer showing you how much time you're wasting, literally black screen and timer. Don't be fooled by the 'inspired by FTL', FTL was fun and engaging. This is not.. It's a shame this game got mostly negative reviews because of issues launching the game when it was released. This is not the case anymore as it launched and we were able to host a server with no problems.

With that said, it's a clunky mess filled with bugs, falling out of bounds, money dupes, spelling errors, and a confusing gear system. But just because it's a bad game doesn't mean it isn't enjoyable.

I bought two copies of CHAOS for \$0.79 to play with a friend and I think it was worth it. The dungeons and mobs are slightly bland but still offers a decent challenge. Because of this I'd recommend playing it with at least one other person.

6.5/10 would fall through the floor again. great game, fun.. The game looks great but is way too short it is less than 15 minutes to complete.

I cannot recommend it at the moment because it is too short to be called a game, it is more like a demo.

I am not even sure what the game is about maybe you run from a terrorist attack in the subway or you are an actual terrorist that blew up part of the subway and you run away from the authorities. The latter would have been a great proof of concept for a storyline. Basically nagivating through the subway, the city, to your apartment to get your passport and escaping on an airplane or other means. The goal would be to go stealth and avoid authorities activating switches, blowing up stuff, setting or avoid traps, etc.

I liked the experience but I cannot recommend at the current price for the duration of the game. However if you dont mind the short duration, it is still a nice experience.. For \$3 you can't go wrong with Blarp. I'd consider it thoroughly in the "wow, look what VR can do!" category... but it is really fun to sling those things around, especially in the teens and mid twenties. Up into the thirties, the blarp swarm seems to be pretty unmanageable (mainly because of the extreme size/speed differences that build up), but by that point you've already had a great time and a long turn, so it's time for someone else to play anyway :P. -the controls hardly work cannot play game

First things first.

As you have noticed this is an episode-based story and unfortunately there wont be a 2nd season.
That being said I think the 1st season is still worth playing.

This game has brought on a new way to play games. Using your phone as a controller. But in reality it is more.
Think of your phone as your Inventory, Character screen AND your controller.

I must say this game is not without its bugs however it is insanely fun (which the videos just doesnt quite transfer)

As of this review this game is a 1-of-its-kind so I suggest you get it. My only hope is that this kind of games will become more common.. When something just comes out new :)

Nice start on your virtual world I am honoured to try it out, keep up the wonderful work.

I was a PSH user for many years before it went down too :)

Take care from Ray

. This, along with the other two Additional Content DLC, add a ton of content.

Only drawback is you'll probably end up running into a monster way, way strong than you. You'll either die miserably, or somehow manage to survive, earning a 7 million EXP payoff at the cost of almost all of your healing and revival items. Good luck!. This DLC contains 2 decks a Red Dragon Archfiend and a Dinomist deck. These cards can only be obtained through the DLC. The cards contained are:

Red Dragon Archfiend:

- 3 Mirror Resonator
- 3 Chain Resonator
- 3 Synkron Resonator
- 3 Red Resonator
- 3 Magical King Moonstar
- 3 Fiendish Rhino Warrior
- 3 Skilled Red Magician
- 3 Red Sprinter
- 3 Dragon's Bind
- 3 Fiend Griefing
- 3 Powerful Rebirth
- 3 Red Cocoon
- 3 Red Supremacy
- 3 Reject Reborn
- 3 Red Wyvern
- 3 Hot Red Dragon Archfiend
- 3 Hot Red Dragon Archfiend Abyss
- 3 Hot Red Dragon Archfiend Bane
- 3 Hot Red Dragon Archfiend King Calamity
- 3 Scarlight Red Dragon Archfiend

Dinomist:

- 3 Dinomist Stegosaur
- 3 Dinomist Plesios
- 3 Dinomist Pteran
- 3 Dinomist Brachion
- 3 Dinomist Ceratops
- 3 Dinomist Rex
- 3 Dinomist Spinos
- 3 Dinomic Powerload
- 3 Dinomist Charge
- 3 Finite Cards

3 Pendulum Impenetrable
3 Dinomist Eruption
3 Dinomist Rush
3 Extra Buck

Without adjustments i couldnt squeek out a single win with the Red Dragon Archfiend deck however the Dinomist deck is as of the time of writing this the single best DLC deck ive played so far and i would highly recommend for campaign. Level Easy took 35mins so how hard can the other levels be? :P I'll find out soon enough...

Con: sometimes it's difficult to place the object *exactly* where it needs to be to receive credit on the correctness scale. Be patient and count the grid squares to make sure you got it where it needs to go before clicking for a Hint.. what a great early access game fun for all. i would say its good game but i was BANNED from discussion forum of this game for nothing by some idiot imbecile

so here u go dont buy this game its suck just as this forum moderator

Version 0.5.3 Update:

Here's what's new in Version 0.5.3

*Added a "News" section.

*Added a "Turn Another Page" option during the start phase of each turn in a Card Battle.

*Small visual improvements

More on Turning Additional Pages. At the start of your turn, before you take any other actions ("While the End Turn button says "Turn Another Page" instead of "End Turn"), you may press the End Turn button. Instead of ending your turn, you will turn a page of your spell book. This feature was added to increase the number of options players have in a Card Battle. This feature should allow battles to be more exciting and varied while still maintaining a high level of planning and skill.. **Cat puzzle A is released!:**

As some of you are aware last weekend we had a few days of meetings between Oovee and Pavel in Cyprus. We also had the privilege to meet someone we expect to join the dev team shortly, which will greatly improve our development processes.

Here is a summary of what was talked about, some will be worked on more before our next meeting in May and we will update you all again then.

It was agreed that we all meet more often, next meeting already arranged - May.

In future updates bug fixes will take priority over new features.

We are expanding the team we have both for the Oovee division of Spintires and for the development team. This will allow faster, better development of Spintires, our support and service to our customers.

We are reviewing and planning to implement an effective QA system using specialized software and trained testers. The advantages to this includes better build quality, along with an improved and efficient schedule with set time frames to process all builds which will mainly be monthly except for urgent fixes.

Game saves is being looked at with a view to implement a proper system, so at the very least updates don't break your history. With explaining from a gamers point of view, Pavel understands that this hold some priority.

We promised mod support by now. After a long talk, Pavel felt that what we could release now would not be what you guys really want or need - nor would it's quality be up to standard. Therefore we are pushing it back by a month to allow for correct implementation and to work out some of the other kinks, for example: researching and investigating the ability to link Steam Workshop and non-Steam mods in game. The outcome will be a system that works properly and will reward you for all your patience. We will release more information on exactly what this will be and what you can do with it in the next week or 2 As well as some screenshots

We have discussed Spintires 2 in detail, with the foundations of a basic plan. This plan will be formulated and expanded upon over the next few weeks, in preparation for our next meeting. The next meeting should be just as productive, with more to be done and a lot of paperwork to be prepared between now and then.. **A little something till we release update v1.0.5:** We're working non-stop to finish update v1.0.5 which will fix the issues you have brought up, as well as a bunch of obvious and under-the-hood enhancements based on your feedback.

Bare with us, as the new update should be ready in a few days time.
In the mean time...
